Summary

iOS Developer with hands-on experience in publishing apps to App Store, building **SDK-style, production-grade apps** using **Swift, SwiftUI, UIKit, and Objective-C**. Skilled in **architectures (RIBs, MVVM, MVC, VIPER, TCA)**, **RESTful API integration**, and performance tuning with **Xcode Instruments, Memory Graphs** and **Swift Concurrency**. Published multiple **App Store apps** including StepBuddy and CulinAI, demonstrating strength in crafting **scalable, reusable components** and **data-driven UX** aligned with Apple's design principles. Strong in server-driven UI, performance optimization and integrating **GraphQL APIs**. Experienced in **CI/CD**, automated testing, and releasing apps at scale. Experience translating Figma designs into functional interfaces.

Technical Skills

Languages: Swift, Objective-C, Python, Java, C, C++, C#, SQL
iOS Development: SwiftUI, UIKit, AutoLayout, HealthKit, PhotoKit, TipKit, ConfidentialKit, CloudKit, AlarmKit, AVFoundation, Core Image, Core Graphics, AVFoundation, Metal, Charts, MapKit, Combine, GraphQL, Apollo iOS Client, RxSwift, Core Animation, Core Location, CocoaPods, CocoaTouch, CoreData, SwiftData, Swift Concurrency, URLSession, Swift Testing, XCTest, XCUITests
Architecture & Testing: Router-Interactor-Builder (RIBs), Model–View–ViewModel (MVVM), Model–View–Controller (MVC), View–Interactor–Presenter–Entity–Router (VIPER), The Composable Architecture (TCA)
Developer Tools: Xcode, Swift Package Manager (SPM), Integration Testing, Xcode Instruments, Time Profiler, lldb, GitHub, GitHub Actions, Fastlane, TestFlight, Firebase (Crashlytics, Analytics), CI/CD, Docker, Kubernetes, AWS (Cognito, S3, Lambda, API Gateway)
Problem Solving: Data Structures and Algorithms (LeetCode 150+), Object-Oriented HL, LL Design, Mobile System Design

Experience

iOS Developer — Apr 2025 – Present
Uber Inc. — *San Francisco, CA*
- Working on the **Uber Earner's App** using **UIKit and RIBs architecture**, contributing to modular feature development, navigation flows, and scalable component design within Uber's mobile platform.
- Improving app performance by learning and applying **Swift Concurrency and using Xcode Instruments** to identify slow operations, helping reduce load times and improve **UI responsiveness by around 25%.** Worked closely with designers and product managers to understand UI states, iterate on designs, and deliver features within an agile sprint process.
- Assisting in fetching data from APIs and updating the UI based on the response.

Mobile Developer Intern — Feb 2025 – Apr 2025
Sports Excitement — *Houston, TX*
- Worked on cross-platform mobile development using **React Native (iOS + Android)**, building authentication flows and developing the **GearHub page** to support product discovery and user engagement.
- Supported the app release process by helping with preparing builds for TestFlight and assisting with App Store submissions. Coordinated with backend engineers to understand API for new features.
- Contributed to shared Swift utility code and API helpers, improving code reuse and making it easier to integrate features across the app.

Software Engineer Intern — Jun 2024 – Aug 2024
Quadrant Technologies — *Seattle, WA*
- Developed and optimized portal features using **React + Flask + PostgreSQL**, integrating AI-based task automation for backend workflows.
- Reduced API latency by 25% through caching and query optimization, improving portal responsiveness.
- Maintained CI/CD pipelines with Docker and Kubernetes, ensuring reliable microservice deployments.

Projects

StepBuddy (HealthKit-powered fitness tracker | App Store Link) — *Swift, SwiftUI, HealthKit, Charts, SwiftData*
- Developed a modular iOS app using **Swift/SwiftUI (MVVM)** integrating HealthKit and Swift Charts to track and visualize fitness metrics such as steps, calories, and heart rate.
- Optimized data persistence and chart rendering with **SwiftData** and concurrency, achieving 95%+ crash-free sessions and App Store–level performance.

CulinAI (On-device AI Recipe Generator | App Store Link) — *Swift, SwiftUI, Foundation Models, CoreML*
- Built a fully on-device AI recipe generator powered by **Apple Foundation Models**, ensuring user privacy and instant local inference.
- Implemented modular CoreML pipelines and lightweight UI components for a scalable, offline-first AI generation experience.

GameShare (UX Design Prototype) — *Figma, UX Research, Wireframing*
- Designed a game-sharing platform with rental options, secure payments, and add-to-cart functionality, focusing on accessibility and seamless user experience.
- Created user flows, wireframes, and interactive prototypes in **Figma**, conducting UX research to identify pain points and improve engagement across key user journeys.

Education

Seattle University — Seattle, WA
M.S. in Computer Science — *Sep 2023 – Jun 2025*
- Coursework: Distributed Systems, Artificial Intelligence, Machine Learning, Software Architecture & Design, Cloud Computing (AWS), Computer Graphics, User Experience Design, Fundamentals of Software Engineering

Amrita Vishwa Vidyapeetham — Kollam, KL
B.Tech in Computer Science — *Jul 2018 – Aug 2022*
- Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, Machine Learning, Distributed Systems, Software Engineering, Computer Organization & Architecture, Cryptography & Information Security
